

For Immediate Release

Nampa, Idaho, October 8, 2020 -- The College of Western Idaho partners with Rapid-Trace to provide contact tracing services to assist in the mitigation of Covid-19 on campus

In an effort to help mitigate the spread of COVID-19 on campus and in the surrounding community, the College of Western Idaho (CWI) has partnered with Rapid-Trace to assist in receiving reports of positive or probable COVID-19 cases from employees and/or students. Rapid-Trace will assist with guidance, resources, and contact tracing.

Rapid-Trace specializes in contact tracing services for academia, corporations, and government entities. Rapid-Trace contact tracers are partnered with CWI to help guide individuals who have contracted the virus to the proper health resources and isolation. They also notify people and take calls from those who were in close contact with an individual who tested positive for the virus to assist with self-quarantine. Rapid-Trace places great importance on client data security and operates within state and national CDC guidelines.

“Rapid-Trace is thrilled to be participating with CWI. This highly organized effort significantly mitigates COVID spread and provides services to affected faculty, staff, and students. We are working across the country in contact tracing and CWI demonstrates best practices that should be implemented with most colleges and universities.” – Scott Rodriguez, President of Rapid-Trace

“Utilizing a company with expertise like Rapid Trace allows us to keep our faculty and staff highly engaged in their fields of expertise; educating and serving students. This partnership helps ensure everyone's safety and keeps our focus on the student where it needs to be.” Dr. Bert Glandon, President, College of Western Idaho.
